

FleetSense - Fleet Intelligence for Indian Logistics

- Startup: FleetSense Technologies Pvt Ltd
- Sector: Logistics SaaS / Fleet Analytics
- Founders: Ananya Rao (CEO, 9 years running fleet operations) and Karthik Menon (CTO, 11 years building telematics platforms)

Problem and Solution

- Problem: mid-size fleet operators lose 12 to 18 percent of fuel and idle-time cost because they cannot see driver and vehicle performance in real time.
- Solution: FleetSense is a SaaS platform that reads telematics data from any vehicle and shows fuel waste, route deviation, and maintenance risk, with automated alerts.
- Customers pay an annual subscription per vehicle; average contract is 3 years.

Market Size (bottom-up)

- TAM: USD 3.6 Billion. 4.2 million commercial trucks in India x USD 850 annual software spend per vehicle.
- SAM: USD 640 Million. 750,000 trucks owned by fleets of 20 or more vehicles (our target segment) x USD 850.
- SOM: USD 32 Million within 3 years. 5 percent of SAM, 37,500 vehicles, based on our current sales pipeline and a 14-person sales team.
- Pricing: USD 850 per vehicle per year, validated across 128 paying customers.

Financials

- Revenue: INR 6.1 Crore in the last 12 months. Current MRR: INR 58 Lakhs.
- Gross margin: 79 percent.
- CAC: INR 42,000 per customer. LTV: INR 4,60,000 per customer. LTV to CAC ratio: 10.9x. CAC payback: 5 months.
- Burn rate: INR 7 Lakhs per month. Cash in bank: INR 2.1 Crore. Runway: 30 months. Monthly burn is well below monthly revenue.

Traction

- 128 paying fleet customers managing 41,000 vehicles.
- Month-over-month revenue growth: 12 percent for the last 10 months.
- Net revenue retention: 121 percent. Monthly logo churn: 0.8 percent.
- Three public-sector logistics contracts signed on 3-year terms.

Competitive Moat

- Proprietary dataset of 1.4 billion kilometres of Indian road and driver telemetry, which improves our fuel-waste model with every customer.
- 2 patents filed on our fuel-waste detection algorithm, 1 patent granted.
- Deep integrations with 14 vehicle manufacturers and 6 ERP systems; customers average 9 months to migrate away.
- Network effect: benchmarking across customers is only possible on our platform.

Team

- Ananya Rao, CEO: ran a 2,000-vehicle fleet for 9 years.
- Karthik Menon, CTO: built telematics products at two listed technology companies.
- Team of 46 people: 22 engineering, 14 sales, 6 customer success, 4 operations.
